

Sl. No.	Course project Title
1	Credit Card Fraud Detection
2	Digital Modulation scheme recognition in Communication
3	Speech/Non-speech classification
4	Using Gaussian mixture models for image segmentation
5	Photometric Classification of Galaxies
6	Movie Recommendation System
7	Facial Expression Recognition using Compact Embeddings
8	Topic Modeling and Latent Dirichlet Allocation
9	Disease Diagnosis Helper
10	ACOUSTIC FINGERPRINTING
11	Offline Digit Recognition
12	Handwriting Signature verification using PRML tools
13	Doodle Recognition
14	Activity Change Detection
15	Offline Handwritten Signature Recognition
16	Using Spotify and Billboard data to predict hit songs
